Profile

Frontend Engineer with **3 years** of experience building data-intensive dashboards, enterprise admin systems, and SaaS apps using **React, TypeScript, Next.js, Node.js, and modern UI engineering practices**. Has experience in a wide range of fields but recently with a strong focus on reusable architecture, data-heavy apps, and performant component systems. Experienced working in fast-paced teams, leading small dev teams, and delivering production-ready features end-to-end.

Professional Experience

Frontend Engineer(Freelance), Geniex - Built a full email-marketing analytics platform: 7 dashboards and 12+ complex data visualizations (Recharts, D3, react-simple-maps). - Engineered a component system + theming architecture with strict TypeScript for fast page development. - Delivered mobile-first responsive layouts and pixel-perfect Figma translations.	Oct 2025 – Present Remote, India
Frontend/Fullstack Engineer, Datalytix - Handled frontend architecture and requirements translation for major government portals. - Refactored TIN Verification Portal, a government tax information number retrieval portal for performance, UX and highload reliability, helping thousands of Nigerians retrieve TIN. - Developed a Fleet Management SaaS (React, Node.js, MSSQL, Docker, Entra ID) for vehicle management, trip tracking, maintenance scheduling, and operational reporting. - Led a 5-dev team delivering an enterprise admin portal, implementing MSAL/Entra authentication, integrating Microsoft-based chatbots, and managing code reviews, architecture decisions, and feature integrations.	Mar 2025 – Present Lagos, Nigeria
Frontend Developer, Intenttech - Shipped features across 2 production apps using React & Next.js. - Integrated APIs with TanStack Query, achieving reliable server-state synchronization.	Jan 2025 – Mar 2025 Harlow, Essex, England (remote)
Frontend Developer Team Lead(Contract), Makkan Innovation - Led a 4-developer frontend team to deliver a real-estate marketplace MVP and admin dashboard (React + TypeScript), implementing standardized Git workflows and code review practices that reduced merge conflicts by 70% and improved code quality and performance. - Designed the app's client/server state architecture and fixed major performance issues	Sep 2024 – Dec 2024 Remote
Front End Developer(Freelance), Pysis Technologies Rapidly onboarded into an existing codebase, built out figma designs and implemented key features including REST API integrations and Zustand state management, accelerating feature delivery for the FishDey marketplace MVP.	Jan 2024 – May 2024 Remote
Frontend Developer(Volunteer), CISSA & NACOSS, UNILORIN Joined developer teams for student bodies in University and: - Led student dev teams enforced structure & performed reviews, reducing code size by 20%. - Built responsive UI for Whisper, a mental-health chat app; handled API integration & UI logic.	Nov 2023 – Dec 2023 University of Ilorin, Ilorin
Intern Frontend Web Developer, Teksphere Global Services Built UI components for logistics app; supported testing & mentored other interns.	Jul 2023 – Dec 2023 Alausa, Ikeja

Skills

Front End Web Development: HTML, CSS, Tailwind CSS, Sass, JavaScript, TypeScript, React, Next.js
State Management: Redux, Redux Thunk, Zustand
Backend Web Development: Node.js, Express JS, Python, Flask
Database Design: PostgreSQL, Firebase, Microsoft SQL Server
Version Control and Deployment: Git, GitHub, Azure DevOps, Docker

Education

Computer Science, University of Ilorin
CGPA: 3.86/5.0
Oct 2019 – Oct 2024
Ilorin, Nigeria
